CHAMAK ACRYLIC WASHABLE DISTEMPER

Chamak Acrylic Washable Distemper is a washable water based paint of soft butter like consistency made from excellent quality emulsions and light fast pigments.

Finish	: Smooth matt finish.
Colour	: As per Chamak Acrylic Washable Distemper Shade card.
Drying Time	: Surface dry 1 hour. Recoatable after 8-12 hours. Normally two coats are enough.
Flash Point	: N.A
Consistency	: Add a little water to the material, stir thoroughly till a smooth creamy consistency results. Add some more water. Total water added should not be more than half the weight of the Acrylic Washable Distemper.
Method of Application	: By brush/Roller/Spray. Surfaces should be free from efflorescence. Old distemper/Lime should be removed by scraping or rubbing down and the surface should be free from loose and flaking materials.
Undercoats	: Self or previously prepared surface
Uses	: Ideal coating for interior decoration of houses, plastered walls, brick work, concrete and asbestos surfaces etc.
Covering Capacity	: 14 Sq. metres per Kg per coat.
Shelf Life	: 12 Months
Packing	: 20kg, 10kg, 5kg, 1kg.
